

Student Centered Goals: Starting point for discussion

The Advisory Committee needs to develop goals for the student-centered system we are developing. The goals will guide the development and implementation of the policy and funding to implement the system.

This paper is a starting point for the goals discussion. Please note that the goals suggested below should be read as being achieved for individual racial and ethnic subgroups and students with disabilities as defined by their individual education plans as well as for the total student population.

- 90% of children are ready for kindergarten when they come to school (joint with the Early Learning Advisory Committee)
- 90% of students are successfully reading to learn by 3rd grade
- All students are culturally competent with the skills to succeed in a diverse world
- All students successfully transition from elementary school to middle school
- Successful transition from middle or junior high school to high school
 - The ninth grade failure rate is reduced by ____ percent.
- 90% of the students graduate high school on-time.
- Graduates leave high school prepared for postsecondary options (career or further education or training)
- 90% of students are successfully implementing their high-school-and-beyond-plan 1 year after high school (joint with the Higher Education Advisory Committee)
